

## PilotGreen pilot programme 2024–2025

### How to apply

#### FORM

Fill in the basic information about the experiment and the provider in the form provided.

#### OFFER

Prepare an offer as a separate attachment to be sent through the form

- Read carefully the invitation to tender, especially the object of the invitation to tender and the criteria to be evaluated
- Describe the content, quality and scope of the experiment (including the concept description)
- Report the total cost of the experiment and what the different costs consist of
- Indicate the material and human resources to be used in the experiment
- Indicate any professional or trade secrets needed to be considered
- Clearly describe how the experiment responds to the criteria identified in the invitation to tender (each criterion as a separate entity so that they can be scored)
  - the novelty value and innovativeness of the experiment
  - feasibility of the experiment
  - effects and impact/benefits of the experiment
  - environmental responsibility and sustainability of the experiment
- In the case of joint offers from several operators, include relevant information about the other partners.

#### Student work and support

- Are you interested in utilising the student works of universities of applied sciences described in the invitation to tender in the experiment?
- What kind of support do you need from LAB University of Applied Sciences to implement the experiment?

#### PREMIUM CONTENTS

Attach any additional materials, such as demo videos, using the form provided.

Please note that all materials related to the offer must be submitted via the files/paste function of the form during the trial application. Documents received after the application period or, for example, sent separately by e-mail, will not be considered, unless they are specifically requested by LAB University of Applied Sciences.
